

## WE ARE LOOKING FOR A

# DevOps engineer

We are looking for an experienced DevOps Engineer to join Ekspress Grupp in building and maintaining the largest media portals in the Baltics.

### Your role:

- You will be developing and maintaining Gitlab CI&CD pipelines.
- You will be configuring environments and managing Kubernetes resources.
- You will be configuring and maintaining logging, tracing, monitoring, and alerting functionalities.
- You will be configuring backup and restore policies and workflows.
- You will be improving deployment- and container-level security.
- You will be organizing and keeping deployment documentation up-to-date.

### Required experience and skills:

- Experience with: Microservices, `Kubernetes`, `Istio`, `Gitlab`, `CI&CD`, `Grafana`, `MySQL`, `Redis`, `Elastic-Search`, `RabbitMQ`, `S3`
- You love optimization and the beauty of automation
- Working knowledge with large data sets (data mining, data analytics and reporting)
- Experience with distributed systems

### Why Ekspress Grupp?

- You will help daily by over 2 million people to know what's going on in the world.
- You will be working with cutting-edge architecture and tech stack.
- You will be working with large-scale microservices architecture under high load = big challenge.
- You will be part of a very talented team.
